

ONESOURCE™
TREATMENT SUPPORT

**If you have
PNH or aHUS,
we're here
for you**

SOLIRIS®
(eculizumab)

Concentrated solution for intravenous infusion

ONESOURCE™
TREATMENT SUPPORT

Having a rare disease can be overwhelming. It's nice to have someone there every step of the way to help answer questions and provide support.

—Soliris patient

SOLIRIS®
(eculizumab)
Concentrated solution for intravenous infusion

To learn more, just call 1.888.SOLIRIS (1.888.765.4747) to speak directly with an Alexion Nurse Case Manager.

Soliris is a prescription medicine called a monoclonal antibody. Soliris is used to treat people with:

- a disease called Paroxysmal Nocturnal Hemoglobinuria (PNH). PNH affects red blood cells
- a disease called atypical Hemolytic Uremic Syndrome (aHUS). aHUS affects the blood system, kidney, and sometimes other body organs

Soliris works by blocking part of your immune system. This can help your symptoms but it can also increase your chance for infection.

Please see enclosed full prescribing information for Soliris, including boxed WARNING regarding serious meningococcal infection.

OneSource™ can help

We offer personalized support—every step of the way.

Whether you just want to learn more about PNH or aHUS, are considering Soliris®, or are already on treatment, OneSource is here to help. Alexion's objective is that every patient with PNH or aHUS, who can benefit from Soliris, will have access to Soliris.

OneSource is a program offered by Alexion, staffed by Alexion Nurse Case Managers. We provide one-to-one education, assistance with funding options and access to Soliris, as well as ongoing treatment support for people living with PNH or aHUS, and their caregivers.

Dealing with a rare disease can be an isolating experience. Patients often feel like they're alone, but that's why I'm here. I can hear the relief in their voices when I help with something that's been troubling them. That's a good feeling—for them and me.

—Alexion Nurse Case Manager

When my insurance provider denied my Soliris coverage, my heart sank. My Alexion Nurse Case Manager answered all of my questions about insurance coverage and helped guide me through the system. We explored every avenue and, thanks to her help, my Soliris is covered. Now I am feeling better and doing the things I enjoy most.

—Soliris patient

OneSource: The support you need—designed just for you

People just like you have told us: Living with a rare disease like PNH or aHUS can be tough. That's why Alexion created OneSource.

OneSource is staffed by Alexion Nurse Case Managers, who are registered nurses with healthcare and insurance experience. An Alexion Nurse Case Manager can provide support designed just for you and your healthcare team every step of the way, whether you are learning more about your disease, exploring treatment options, getting ready to begin Soliris therapy, or currently being treated with Soliris.

Just remember, your doctor is the one who decides whether Soliris therapy is right for you.

SOLIRIS[®]
(e c u l i z u m a b)
Concentrated solution for intravenous infusion

Whether you have a general question or are seeking help with funding options or arranging your Soliris therapy, OneSource is here to help. Just call **1.888.SOLIRIS (1.888.765.4747)**.

Remember, information provided by OneSource is meant to add to what you have learned from your doctor. Only you and your doctor can decide how best to monitor and manage your disease.

At Alexion, we respect patient confidentiality

When you call OneSource™ with a general question about PNH, aHUS, or Soliris, we don't need special permission to share information with you. More often, however, people contact OneSource when they have specific questions regarding their own situation. When the conversation involves your medical condition or financial options, we'll need your written permission to work with others to gather and share answers with you.

The process of giving your permission is simple. OneSource will provide an Authorization Form, which you will need to return to your Alexion Nurse Case Manager after signing it in 2 places. This allows us to work with your insurance company or other financial sources to explore your funding options.

In fact, OneSource takes your privacy seriously. Even with your permission, we only share personal information with others on an "as needed" basis.

Please see enclosed full prescribing information for Soliris, including boxed WARNING regarding serious meningococcal infection.

What can an Alexion Nurse Case Manager do for you?

Just call **1.888.SOLIRIS (1.888.765.4747)**, toll free, and with no obligation, to find:

- **Education**

Alexion Nurse Case Managers work with people with PNH and aHUS every day. Feel free to ask them about PNH, aHUS, or Soliris. They can help provide answers and send you useful educational resources.

- **Assistance with access to Soliris**

OneSource can help you and your doctor find your way through insurance coverage issues, funding options, and other needs that are important to your treatment plan.

- **Ongoing treatment support**

If you and your doctor decide that Soliris is right for you, your Alexion Nurse Case Manager can help answer questions and let you know what to expect throughout your Soliris therapy. Whether you are traveling, changing your insurance, or experiencing a major life event, be it a marriage, a job change, or even a change of address, we're here for you every step of the way.

- **Shared connections**

If you want to speak with someone who knows what you're going through, your Alexion Nurse Case Manager can put you in touch with another person also living with your disease.

I was really nervous before my first infusion because I didn't know what it would be like. My Nurse Case Manager walked me through exactly what would happen and what to expect on that day. She helped answer my questions, which made me feel more prepared. Thanks to her, I felt at ease at my first infusion and they have been going well ever since.

— Soliris patient

Serious allergic reactions can happen during your Soliris infusion. Tell your doctor or nurse right away if you get any of these symptoms during your infusion: chest pain; trouble breathing or shortness of breath; swelling of your face, tongue, or throat; or feeling faint or passing out.

You are not alone

Although PNH and aHUS are rare, support is not hard to come by.

Call OneSource at 1.888.SOLIRIS (1.888.765.4747) to speak one-to-one with an Alexion Nurse Case Manager. Case managers can assist you with additional education and helpful resources, information about insurance issues, funding options, and ongoing treatment support as you and your doctor manage your condition. They can even put you in touch with other people living with your disease.

Please see enclosed full prescribing information for Soliris, including boxed WARNING regarding serious meningococcal infection.

When we decided to attend our grandson's graduation, my Nurse Case Manager arranged for me to receive Soliris at an infusion center halfway across the country. Not only did that make it possible for me to travel, but I also was able to relax and enjoy myself, knowing that I was not going to miss a scheduled infusion. More importantly, I was able to be part of a family celebration, something I will appreciate and remember forever.

Important Safety Information

WARNING: SERIOUS MENINGOCOCCAL INFECTIONS

See full prescribing information for complete boxed warning

Life-threatening and fatal meningococcal infections have occurred in patients treated with Soliris and may become rapidly life-threatening or fatal if not recognized and treated early.

- **Comply with the most current Advisory Committee on Immunization Practices (ACIP) recommendations for meningococcal vaccination in patients with complement deficiencies.**
- **Immunize patients with a meningococcal vaccine at least 2 weeks prior to administering the first dose of Soliris, unless the risks of delaying Soliris therapy outweigh the risks of developing a meningococcal infection. (See *Serious Meningococcal Infections* for additional guidance on the management of the risk of meningococcal infection.)**
- **Monitor patients for early signs of meningococcal infections, and evaluate immediately if infection is suspected.**

Soliris is available only through a restricted program under a Risk Evaluation and Mitigation Strategy (REMS). Under the Soliris REMS, prescribers must enroll in the program.
